

Welcome to **myAgios® Patient Support Services**, helping you navigate **the path ahead**

One team to support people
living with thalassemia

ACEs and PSMs do not provide medical advice. For medical advice or treatment-related questions, please talk to your healthcare team.

Not a native English speaker? No problem.

We have language translation services available in the following languages: 简体中文 (Chinese), العربية (Arabic), Tiếng Việt (Vietnamese), ودری (Urdu), हिंदी (Hindi), and many more.

What is AQVESME?

AQVESME is a prescription medicine used to treat anemia (low red blood cells) in adults with alpha- or beta-thalassemia. It is not known if AQVESME is safe and effective in children.

IMPORTANT SAFETY INFORMATION

AQVESME may cause serious side effects, including:

- **Liver injury.** AQVESME can cause serious liver injury. Liver injury has happened in people with thalassemia within the first 6 months of treatment with AQVESME. Your healthcare provider will do blood tests to check your liver before you start treatment with AQVESME, every 4 weeks for the first 24 weeks of treatment, and as needed. Your healthcare provider may temporarily or permanently stop your treatment with AQVESME if you have abnormal liver blood tests.

Tell your healthcare provider right away if you develop any new or worsening signs or symptoms of liver problems, including:

- loss of appetite
- nausea
- pain in the upper right side of your stomach area
- vomiting
- yellowing of the skin and white part of your eyes (jaundice)
- dark-colored urine

Please see additional Important Safety Information throughout and full Prescribing Information, including Medication Guide.

Patient
Education

Enrollment

For one-on-one education and learning about treatment options, talk to an Agios Clinical Educator (ACE)

An ACE works closely with you, your family, and your healthcare team to provide education, resources, and community connections.

Cindy

PharmD, ACE
16 years of healthcare experience
New York

I value the importance of breaking barriers and fostering a more inclusive educational environment.

Your ACE can help with:

Individualized Support

Meet with your ACE either in person or virtually to get compassionate support that will help you identify your goals, understand monthly monitoring requirements, and help you thrive

Educational Resources

Find assistance with doctor discussions, information about your disease, explanations of the latest research, and treatment and monitoring considerations

Community Connections

Build connections through webinars, community events, advocacy groups, and others like you

Meet your ACE by scanning this code:

We can connect in person or virtually at a time that is convenient for you.

IMPORTANT SAFETY INFORMATION (cont.)

In clinical studies of AQVESME, 2 of 301 people (0.66%) treated with AQVESME experienced adverse reactions suggestive of liver injury. Three additional people experienced adverse reactions suggestive of liver injury during the open-label extension periods, after switching from placebo to AQVESME. Of the 5 people, two had serious liver injury requiring hospitalization, including 1 who developed jaundice. Another developed jaundice without requiring hospitalization. All 5 people discontinued treatment with AQVESME, and these reactions improved upon treatment discontinuation.

Because of the risk for liver injury, AQVESME is only available through a restricted access program called the AQVESME Risk Evaluation and Mitigation Strategy (REMS).

Please see additional Important Safety Information throughout and full Prescribing Information, including Medication Guide.

For help with getting AQVESME™ (mitapivat), connect with a Patient Support Manager (PSM)

Your PSM will help you find ways to make it easier to get the AQVESME you've been prescribed.

Your PSM can help with:

Filling and getting your AQVESME prescription

Clearing up any insurance confusion

Speaking and working with your doctor

Helping you set treatment goals

Connecting you to events and a wider community

We have programs that take the worry out of getting AQVESME

We can figure out your needs and walk you through the financial assistance and coverage support programs that help people in different situations.

AQVESME Copay Program

\$0 responsibility for those with commercial insurance, regardless of how much they make

Patient Assistance Program

For people with government or commercial insurance, or who are uninsured, or who do not have coverage for AQVESME

Coverage Interruption Program

For people experiencing an interruption in their insurance coverage. People with government health insurance plans are not eligible

Full terms and conditions are available at myAgios.com/AQVESME

Lana

RN, BSN, PACS, PSM
9 years of healthcare experience
Northwest

It's rewarding to be able to help someone through challenges and provide tools for their treatment journey.

Meet your PSM by scanning this code:

We can connect by phone at a time that is convenient for you.

IMPORTANT SAFETY INFORMATION (cont.)

Before taking AQVESME, tell your healthcare provider about all of your medical conditions, including if you:

- have liver problems, such as cirrhosis
- are pregnant or plan to become pregnant. It is not known if AQVESME will harm your unborn baby. Tell your healthcare provider right away if you become pregnant or think that you are pregnant during treatment with AQVESME.
- are breastfeeding or plan to breastfeed. It is not known if AQVESME passes into your breast milk. Talk to your healthcare provider about the best way to feed your baby during treatment with AQVESME.

Please see additional Important Safety Information throughout and full Prescribing Information, including Medication Guide.

Your ACE and your PSM are here to work **as your team**

ACE helps with

One-on-one disease education and support in understanding treatment options

Monthly monitoring requirements for AQVESME™ (mitapivat)

Support and resources for living with your condition

Community connections to others like you

PSM helps with

Understanding your insurance

Getting AQVESME

Speaking and working with your doctor

Exploring ways to make AQVESME more affordable

ACEs and PSMs do not provide medical advice. For medical advice or treatment-related questions, please talk to your healthcare team.

Getting Started on AQVESME: 3 Simple Steps

Once you and your doctor have reviewed AQVESME clinical and REMS information and decided AQVESME is right for you, these are the steps to start treatment promptly:

1

You and your doctor complete and sign the AQVESME Start Form and your doctor completes AQVESME REMS certification

2

Complete liver test

3

Your doctor enrolls you in AQVESME REMS

The myAgios® team will ensure that AQVESME is delivered directly to your home through an exclusive REMS-certified Specialty Pharmacy.

Your doctor can help answer questions along the way. For more information, visit [AQVESMEREMS.com](https://www.aqvesmerems.com) or call 1-800-625-9951 Mon-Fri, 8 AM to 8 PM ET.

For any questions regarding myAgios, visit [myAgios.com](https://www.myagios.com) or call **1-877-77-AGIOS** (1-877-772-4467).

IMPORTANT SAFETY INFORMATION (cont.)

Tell your healthcare provider about all the medicines that you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements. Make sure to tell your healthcare provider if you take or use hormonal birth control (contraceptives). If you take or use hormonal birth control (except for intrauterine systems containing levonorgestrel), it may not work as well during treatment with AQVESME. Use a different type of birth control or use an additional nonhormonal birth control method (such as condoms) during treatment with AQVESME and for 28 days after stopping treatment with AQVESME. AQVESME and certain other

medicines may affect each other and cause side effects. AQVESME may affect the way other medicines work, and other medicines may affect the way AQVESME works.

The most common side effects of AQVESME in patients:

- headache
- insomnia

These are not all of the possible side effects of AQVESME. Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.

Please see full Prescribing Information, including Medication Guide.
